

Action Plan for Clean Air, Dera Baba Nanak

13th Feb 2019

Directorate of Environment and Climate Change
Department of Science, Technology and Environment,
Government of Punjab

Table of Contents

Chapter 1 - Introduction	6
1.1. About Air Pollution	6
1.2. About Dera Baba Nanak	6
1.3. Governmet’s past efforts for control of Air pollution	7
1.4. About National Green Tribunal directions	7
Chapter 2 – Vision, Mission and Strategy	10
2.1. Mission Tandarust Punjab	10
2.2. Vision for Clean Air, Dera Baba Nanak	10
2.3. Mission Clean Air, Dera Baba Nanak	10
2.4. Strategy for Clean Air, Dera Baba Nanak.....	10
2.5. Identification of the Govt. Stakeholders	10
2.6. Non- Government Stakeholders.....	12
2.7. Nodal Department.....	12
2.8. Integration of Departmental plans.....	12
2.9. Citizen participation	12
2.10. Design of Monitoring System	12
2.11. Governance	13
Chapter 3 – Current Status and Trends of Air Quality in Dera Baba Nanak	14
3.1 Monitoring of Air Quality:	14
3.2 CPCB’s Norms for Air Quality	14
3.3 Air Quality Index (AQI).....	15
3.4 Trends of Quality of Air	16
3.5 Major Parameters of Concern:.....	16
Chapter 4 – Sources of Air Pollution in Dera Baba Nanak	17
4.1 Major Sources.....	17
4.2 Vehicular Emissions.....	17
4.3 Road Dust	17
4.4 Burning of Biomass and Garbage	18
4.5 Industrial Emissions.....	18
4.6 Mining.....	18
4.7 Construction and Demolition Activities.....	18
4.8 Others.....	18
Chapter 5 –Control on Vehicular Emissions.....	20

5.1	Key Activities	20
5.2	CVE 1 - Public awareness campaign for control of vehicular emissions	20
5.3	CVE 2 - Remote sensor based PUC system.....	21
5.4	CVE 3 - Extensive drive against polluting vehicles.....	21
5.5	CVE 4 - Prevent parking of vehicles in non-designated areas:	21
5.6	CVE 5 - Check fuel adulteration :.....	21
5.7	CVE 6 - Widening of road and improvement of infrastructure to decongest roads	21
5.8	CVE 7 - Construction of expressways/ bypasses to avoid congestion.....	21
5.9	CVE 8 - Introduce intelligent traffic systems	22
5.10	CVE 9 - Install weigh in motion bridges at the borders of cities	22
5.11	CVE 10– Phasing of vehicles more than 15 years old.....	22
5.12	CVE 11 - Promotion of battery operated vehicles.....	22
5.13	CVE 12 – Introduction of CNG based public transport.....	22
5.14	CVE 13 - Retrofitting of particulate filters in diesel vehicles for BS-V fuels	22
Chapter 6–Control On Road Dust		23
6.1	Key Activities	23
6.2	CRD 1 – Maintain potholes free roads for free-flow of traffic	23
6.3	CRD 2 – Water sprinkling:.....	23
6.4	CRD 3 – Mechanical sweeping:	23
6.5	CRD 4 – Creation of green buffers along the traffic corridors:	23
6.6	CRD 5 – Water fountains at major traffic intersections:.....	24
6.7	CRD 6 – Greening of open areas community places, schools and housing societies:.....	24
6.8	CRD 7 – Blacktopping of metaled road including pavement of road shoulders:	24
Chapter 7–Control on Burning of Garbage and Biomass.....		25
7.1	Key Activities	25
7.2	CBGB 1 –Control of open burning of bio-mass in City:	25
7.3	CBGB 2 – Control of burning of municipal solid wastes:.....	25
7.4	CBGB 3 – Control of burning of agriculture waste and crop residue:	26
Chapter 8 – Control on Industrial Emissions.....		27
8.1	Key Activities	27
8.2	CIE 1 – Conversion to side-hood suction in furnaces	27
8.3	CIE 2 – Conversion to CNG/ PNG from Coal	27
8.4	CIE 3 - Conversion of natural draft brick kilns to induced draft	27
8.5	CIE 4 - Action against non-complying industrial units.....	27

8.6	CIE 5 – Shifting of industries from non-designated areas to industrial areas.....	27
Chapter 9 – Control on Construction and Demolition activities.....		29
9.1	Key Activities	29
9.2	CCDA 1 –Enforcement of Construction & Demolition Rules:.....	29
9.3	CCDA 2 – Control measures for fugitive emissions:	29
9.4	CCDA 3 – Ensure carriage of construction material in closed/covered vessels:	29
Chapter 10 – Control on Other Sources.....		30
10.1	Key Activities	30
10.2	COS 1 – Dissemination of Air Quality Index	30
10.3	COS 2 – Establish an Air Quality Management Division at SPCB HQ.....	30
10.4	COS 3 – Setup helpline in each city/town as well as SPCB HQ.....	30
10.5	COS 4 - Coverage of LPG/PNG for domestic and commercial cooking	30
10.6	COS 5 - Monitoring of DG sets and action against violations.....	31
Chapter 11–Graded Response Action Plan for Dera Baba Nanak		33
11.1	Graded Responses.....	33
11.2	Agency Responsible for Graded Response.....	33
11.3	Action in case of Severe AQI (Value between 401 to 500).....	33
11.4	Action in case of Very Poor AQI (Value between 301 to 400).....	34
11.5	Action in case of Poor AQI (Value between 201 to 300).....	34
11.6	Action in case of moderately polluted AQI (Value between 101 to 200)	35
Chapter 12– Monitoring Requirements and Formats.....		36
12.1	Monitoring Requirement:	36
12.2	Development of Monitoring System	36
Chapter 13–Governance and Supervision		37
13.1	Three Tier Monitoring	37
13.2	AQMC at District Level	37
13.3	AQMC at State Level.....	38
13.4	Steering Committee.....	38
Chapter 14 –Risk Mitigation Plan.....		39
14.1	Identification of Major Risks	39
14.2	Source Apportionment Study.....	39
14.3	Accuracy and completeness of baseline data, targets and milestones	39
14.4	Lack of formal analysis of implementation barriers.....	39
Annexure A – Trends in Air Quality of Dera Baba Nanak.....		40

Annexure B – Action Plan for Control on Vehicular Emissions	41
Annexure C – Action Plan for Control on Road Dust	46
Annexure D – Action Plan for Control on Burning of Garbage and Biomass	49
Annexure E – Action Plan for Control on Industrial Emissions	50
Annexure F – Action Plan for Control on Construction and Demolition Activities	51
Annexure G – Action Plan for Control on Other Sources.....	52

Chapter 1 - Introduction

1.1. About Air Pollution

1.1.1 Air pollutant means any solid, liquid or gaseous substance present in the atmosphere in such concentration as may be or tend to be injurious to human being or other living creatures or plant or property or environment. Air pollution means the presence of air pollutants in the atmosphere. The most common sources of air pollution include particulates, oxides of nitrogen, sulphur dioxide and ozone.

1.1.2 The health effects caused by air pollution may include difficulty in breathing, wheezing, coughing, asthma and worsening of existing respiratory and cardiac conditions.

1.2. About Dera Baba Nanak

1.2.1 History

Dera Baba Nanak is a small town located near the Indo-Pak border in District Gurdaspur in State of Punjab. It is a Sub Division of District-Gurdaspur. It is a Municipal Council and is located about 39 km from Gurdaspur, the headquarters of the district.

Dera Baba Nanak Town is situated only 1 km from India-Pakistan border and the historical Gurdwara Kartarpur Sahib, which is located in Pakistan can be seen from the Border with naked eyes which is at a distance of about 4-5 kms from the Indian Boarder. Two famous Gurudwara at Dera Baba Nanak are Sri Darbar Sahib and Sri Chola Sahib. Dera Baba Nanak, one of the most sacred places of the Sikhs, is situated on the banks of river Ravi. Pilgrims come to this holy town in large numbers. Dera Baba Nanak was made the headquarter of newly created Tehsil of Dera Baba Nanak and it is a historical town and has many lanes and houses that have been preserved since the time of Shri Guru Nanak Dev Ji.

1.2.2 Area and Population

As of 2011 India census, Dera Baba Nanak had a population of 6394. Males constitute 52% of the population and females 48%. Dera Baba Nanak has an average literacy rate of 75%, higher than the national average of 59.5%: male literacy is 78%, and female literacy is 72%. In Dera Baba Nanak 12% of the population is under 6 years of age.

1.2.3 Industry & Trade

At present, there is no Air Polluting industry operating within the M.C. limits.

1.2.4 Topography

All the Tehsils of the district namely Gurdaspur, Batala and Dera Baba Nanak are plain and similar to the rest of the plains in structure. The land scape of the district has varied topography comprising undulating plan, the flood plains of the Ravi and the Beas and the up land plain.

To its south lies an area of about 128 km² which is highly dissected and is an undulating plain. Its elevation ranges from about 305 to 381 meters above sea level. It is traversed by a number of choas and has an undulating topography.

The flood plains of the Ravi and the Beas are separated from the up land plain by sharp river cut bluffs. They are low lying, with slightly uneven topography. Sand dominates in the soil structure of the flood plains, but it diminishes in both quantity and coarseness in the upland plain. The up land plain covers a large part of the district particularly. Its elevation ranges from about 305 meters above sea level in the north-east to about 213 meters above sea level in the south west, with a gentle gradient of about 1 meter in 1.6 km. This is the most important physiographic unit in the district.

1.2.5 **Climate**

There are mainly two seasons i.e. summer and winter. The summer season falls between the months of April to July and the winter November to March. In summer season the temperature touches 44°C or even sometimes crosses it. June is the hottest month and January is the coldest one. Mostly the rain falls in the month of July. The winter rains are experienced during January and February. The dust storm occurs in the month of May and June.

1.2.6 **Rainfall**

The south-west monsoon generally arrives in the first week of July and continue up to the end of August. 70% of the rainfall occurs during this period.

1.3. **Government's past efforts for control of Air pollution**

Manual RSPM sampler was installed at C-PYTE for measurement of RSPM, SO₂, NO_x for rural areas in the year 2016 bearing of International Border line of Indo-Pakistan Border. Air pollution monitoring was being done.

1.4. **About National Green Tribunal directions**

1.4.1 Nine cities of Punjab namely DeraBassi, Nangal, Patiala, MandiGobindgarh, Khanna, Ludhiana, Jalandhar, Dera Baba Nanak and Amritsar were declared non-attainment cities by Central Pollution Control Board (CPCB) on the basis of Ambient air data for the period of 2011-2015 for not meeting the annual average of 60 µg/m³ for PM₁₀. Directions were issued to the Board by CPCB to prepare action plans for the above stated non-attainment cities of Punjab.

1.4.2 Subsequently, National Green Tribunal has taken cognizance of draft National Clean Air Program and passed directions in the matter of application no. 681 of 2018 dated 8/10/2018. The important points of the said directions given as under:

- (i) Action plans to be prepared within two months aimed at bringing the standards of air quality within the prescribed norms within six months from date of finalization of the action plans.
- (ii) The action plans may be prepared by six member committee comprising of Director of Environment, Transport, Industries, Urban Development, Agriculture and Member Secretary, State Pollution Control Board under the overall supervision of Principal Secretary, Environment and further supervised by Chief Secretary.
- (iii) The Action plans may take into account the GRAP, the CAP and the action plan prepared by CPCB as well as all other relevant factors.
- (iv) The Action Plan will include components like identification of source and its apportionment considering sectors like vehicular pollution, industrial pollution, dust pollution, construction activities, garbage burning, agricultural pollution including pollution caused by burning of crop residue, residential and indoor pollution etc.
- (v) The Action plan shall also consider measures for strengthening of Ambient Air Quality (AAQ) monitoring and steps for public awareness including issuing of advisory to public for prevention and control of air pollution and involvement of schools, colleges and other academic institutions and awareness programmes.
- (vi) The Action plan will indicate steps to be taken to check different sources of pollution having speedy, definite and specific timelines for execution.
- (vii) The Action plan should be consistent with the carrying capacity assessment of the non-attainment cities in terms of vehicular pollution, industrial emissions and population density, extent of construction and construction activities etc. The carrying capacity assessment shall also lay emphasis on agricultural and indoor pollution in rural areas. Depending upon assessed carrying capacity and source apportionment, the authorities may consider the need for regulating, number of vehicles and their parking and plying, population density, extent of construction and construction activities etc. Guidelines may accordingly be framed to regulate vehicles and industries in non-attainment cities in terms of carrying capacity assessment and source apportionment.
- (viii) The CPCB and SPCBs shall develop a public grievance redressal portal for redressal of public complaints on air pollution alongwith a supervisory mechanism for its disposal in a time bound manner. Any visible air pollution can be reported at such portal by email/SMS.
- (ix) The CPCB and all SPCBs shall collectively workout and design a robust nationwide ambient air quality monitoring programme in a revised format by strengthening the existing monitoring network with respect to coverage of more cities / towns. The scope of monitoring should be expanded to include all twelve (12) notified parameters as per notification no. B-29016/20/90/PCI-L dated 18th November of

CPCB. The Continuous Ambient Air Quality Monitoring Stations (AAQMS) should be preferred in comparison to manual monitoring stations. The CPCB and States shall file a composite action plan with timelines for its execution which shall not be more than three months.

- 1.4.3 Earlier, NGT had also issued various directions in OA No. 21 of 2014 titled as Vardhaman Kaushik V/s Union of India and Others for combating air pollution.

Chapter 2 – Vision, Mission and Strategy

2.1. **Mission Tandarust Punjab**

The Government of Punjab envisions to make Punjab the healthiest State with healthy people by ensuring the quality of air, water, food and a good living Environment.

2.2. **Vision for Clean Air, Dera Baba Nanak**

To restore the quality of air in Dera Baba Nanak to the prescribed standards to ensure health of the people, ecological balance and socio-economic well-being of the people.

2.3. **Mission Clean Air, Dera Baba Nanak**

To prepare and implement a comprehensive action plan for clean Dera Baba Nanak:

- (i) Creating awareness about the adverse impact of air pollution
- (ii) Identifying the sources of air pollution, their apportionment
- (iii) Identifying action steps related to Awareness, Enforcement, Infrastructure or Policy for control of various sources of Air Pollution
- (iv) Designing effective systems for monitoring the progress of the implementation of action steps
- (v) Ensuring effective monitoring of the quality of air
- (vi) Mitigating adverse impact on health of the people due to air pollution

2.4. **Strategy for Clean Air, Dera Baba Nanak**

The key elements of strategy for Clean Air campaign for Dera Baba Nanak will include:

- (i) Identification of Government Stakeholders
- (ii) Identification of Non-Government Stakeholders
- (iii) Integration of Departmental plans – Creating synergies
- (iv) Nodal Department
- (v) Citizen Participation
- (vi) Monitoring and Governance

2.5. **Identification of the Govt. Stakeholders**

In order to combat the challenges of air pollution, all the Stakeholders will have to make concerted efforts. Following Departments and agencies have been identified along with their responsibilities:

- (i) **Punjab Pollution Control Board**
 - (a) Monitoring of air pollution control devices installed by industries
 - (b) Up-gradation of existing air pollution control devices
 - (c) Monitoring of ambient air quality and stack emissions
 - (d) Provide canopies on the existing D.G sets

- (ii) **Department of Local Government/ MC Dera Baba Nanak**
 - (a) Development of engineered municipal solid waste dump site
 - (b) Improvement of road infrastructure for smooth traffic movement
 - (c) Regular and mechanical cleaning of roads
 - (d) Sprinkling of in the parks and maintenance of fountains
 - (e) Increasing green cover in city
 - (f) Upgrading traffic lights for smooth traffic movement
 - (g) Provide canopies on the existing D.G sets

- (iii) **Department of Transport**
 - (a) Plan for effective traffic management
 - (b) Plan for phasing out old polluting vehicles
 - (c) Shift to cleaner fuels viz. CNG etc.
 - (d) Monitoring of vehicles without PUC certificate
 - (e) Banning of pressure horns

- (iv) **Department of Police**
 - (a) Planning and enforcement of traffic management plan
 - (b) Checking of vehicles running without PUC certificate
 - (c) Impounding and challan of vehicles running without permission/ registration.

- (v) **Department of Forests**
 - (a) Preparation of afforestation plan
 - (b) Organizing awareness camps for Greener City
 - (c) Providing green belt around the industrial areas

- (vi) **Department of Industries and Commerce / PSIEC**
 - (a) Shifting of industries from non-designated areas
 - (b) Provision of environment infrastructure in Industrial Areas

- (vii) **PWD (B&R)**
 - (a) Improving road conditions for smooth movement of traffic
 - (b) Increasing green cover on roadside under their jurisdiction

- (viii) **Punjab State Council for Science and Technology**
 - (a) Evolving cost-effective cleaner technologies

- (ix) **Department of Agriculture**
 - (a) Promotion of bio-mechanization and compost facilities for agro waste
 - (b) To provide Machinery for in-situ management
 - (c) To create awareness about ill-effects of stubble burning
 - (d) To create awareness regarding alternative crops to break wheat-rice cycle.

(x) **District Administration**

- (a) Coordination with all the Stakeholders promoting collaboration and resolving local issues
- (b) Public Awareness Campaign

2.6. **Non- Government Stakeholders**

2.6.1 There is need to involve Brick kiln and rice sheller associations of Dera Baba Nanak in this plan. These association will help in the following activities:

Generic

- (i) To stabilize the vehicular movement area within premises of the industries
- (ii) To persuade the member industries to comply with emission norms by PPCB
- (iii) To evolve more efficient machinery, boiler furnace and air pollution control devices which may be adopted by all the industries for better environment

2.6.2 Apart from Industry Associations, the support of various NGOs in the city Dera Baba Nanak will be sought. These NGOs will assist in the following:

- (i) To create awareness among the public regarding ill-effects of air pollution
- (ii) To motivate residents of Dera Baba Nanak for adopting the practices to minimize the use of fresh water, planting more trees, to promote pooling by minimal use of private vehicles. Parking of vehicles in the designated zones, minimum use of electricity etc
- (iii) To give suggestions to District Level Committee to control or minimize the air pollution
- (iv) To give feedback on enforcement activities

2.7. **Nodal Department**

The Department of Science, Technology and Environment will be the nodal department for coordinating and monitoring activities of the plan.

2.8. **Integration of Departmental plans**

The Nodal Department will integrate plans of individual departments for control of pollution from various sources and prepare a comprehensive plan.

2.9. **Citizen participation**

Citizen participation will be key to the success of the plan. Effort will be made to seek citizen participation in various public awareness activities, feedback and support in various enforcement related activities. A strong social media and technology driven platform will be set up to seek citizens particularly youth participation.

2.10. **Design of Monitoring System**

2.10.1 Various measures envisaged under the action plan for control of pollution can be classified in the following categories:

- (i). Public Awareness
- (ii). Effective Enforcement
- (iii). Creation of new Infrastructure
- (iv). Maintenance related activities
- (v). Policy Advocacy
- (vi). Technology Support

2.10.2 Monitoring of various activities of the Action Plan will be key to achieve the outcomes envisaged under the Action Plan. Different kind of monitoring systems will be required for different categories of activities:

- (i). Design of effective online platform including social media to disseminate air pollution related information and seek citizen feedback and participation in the campaign. It will have a monitoring mechanism to see the level of participation and measures to increase the same.
- (ii). Design of effective online system to capture various enforcement activities by various agencies to monitor them, evaluate them and provide feedback and enforce accountability.
- (iii). Design of an effective monitoring system to monitor the progress of various infrastructure related activities as envisaged under the plan.
- (iv). Design of an effective monitoring system for policy advocacy within the Government for expediting formulation of various policies.
- (v). Design of an effective monitoring system for various technological interventions to reduce the air pollution.

2.10.3 Directorate of Environment and Climate Change and PPCB will set up a dedicated team for design of monitoring system and setting up of IT platform for tracking progress of the plan.

2.11. **Governance**

The monitoring of progress, coordination of various activities, corrective measures required and fixing of accountability will be done by Air Quality Monitoring Committees at the District level under Deputy Commissioner, State Level under Principal Secretary, Environment and Apex Committee under Chief Secretary.

Chapter 3 – Current Status and Trends of Air Quality in Dera Baba Nanak

3.1 Monitoring of Air Quality:

Dera Baba Nanak Town is situated only 1 km from India-Pakistan border Manual RSPM sampler was installed at C-PYTE for measurement of RSPM, SO₂, NO_x for rural areas in the year 2016 bearing of International Border line of Indo-Pakistan Border. Air pollution monitoring was being done. The year wise data of PM₁₀, SO₂ and NO_x for the period 2014-18 is placed at Annexure-A.

3.2 CPCB's Norms for Air Quality

The CPCB on 18/10/2009 has revised National Ambient Air Quality Standards (NAAQS) which are reproduced as under:-

Sr. No.	Pollutants	Time weighted average	Concentration of Ambient Air	
			Industrial, Residential, Rural and other areas	Notified Ecologically sensitive area
1	Sulphur Dioxide (SO ₂) µg/m ³	Annual	50	20
		24 hours	80	80
2	Nitrogen Dioxide (NO ₂) µg/m ³	Annual	40	30
		24 hours	80	80
3	Particulate Matter (size<10 µm) or PM ₁₀ µg/m ³	Annual	60	60
		24 hours	100	100
4	Particulate Matter (size<2.5 µm) or PM _{2.5} µg/m ³	Annual	40	40
		24 hours	60	60
5	Ozone (O ₃) µg/m ³	8 hours	100	100
		1 hour	180	180
6	Lead (Pb), µg/m ³	Annual	0.50	0.50
		24 hours	1.0	1.0
7	Carbon Monoxide (CO), mg/m ³	8 hours	02	02
		1 hour	04	04
8	Ammonia (NH ₃), µg/m ³	Annual	100	100
		24 hours	400	400
9	Benzene (C ₆ H ₆) µg/m ³	Annual	05	05
10	Benzo (a) Pyrene (BaP)- particulate phase only	Annual	01	01

	ng/m ³			
11	Arsenic (As) ng/m ³	Annual	06	06
12	Nickel (Ni) ng/m ³	Annual	20	20

3.3 Air Quality Index (AQI)

3.3.1 Awareness of daily levels of air pollution is important to the citizens, especially for those who suffer from illnesses caused by exposure to air pollution. Further, success of a nation to improve air quality depends on the support of its citizens who are well-informed about local and national air pollution problems and about the progress of mitigation efforts. Thus, a simple yet effective communication of air quality is important. The concept of an air quality index (AQI) that transforms weighted values of individual air pollution related parameters into a single number is widely used for air quality communication and decision making.

3.3.2 The AQI system is based on maximum operator of a function (i.e. selecting the maximum of subindices of individual pollutants as an overall AQI). The objective of an AQI is to quickly disseminate air quality information (almost in real-time) that entails the system to account for pollutants which have short-term impacts. Eight parameters (PM10, PM2.5, NO₂, SO₂, CO, O₃, NH₃, and Pb) having short-term standards have been considered for near real-time dissemination of AQI.

3.3.3 The AQI has further been classified in six categories as shown below:

AQI	Quality	Impact on health
0-50	Good	Minimal impact
51-100	Satisfactory	Minor breathing discomfort to sensitive people
101-200	Moderate	Breathing discomfort to people with lungs, asthma and heart diseases
201-300	Poor	Breathing discomfort to most people on prolonged exposure
301-400	Very poor	Respiratory illness on prolonged exposure
>401	Severe	Affects healthy people and seriously impacts those with existing diseases.

3.3.4 Based on this, the CPCB evolved a Graded Response Action plan (GRAP) which is implemented in the NCR, Delhi when the air quality deteriorates and various steps have been mentioned in GRAP to be taken to immediately control the deterioration of the air quality.

3.4 Trends of Quality of Air

3.4.1 No Continuous Ambient Air Quality Monitoring Station (CAAQMS) has been installed at Dera Baba Nanak to measure the ambient air quality of the area. Detail of PM10, SO₂ and NO_x measured during the previous years tabulated in **Annexure-A**. Annual average of PM10, SO₂ and NO_x for the last 2 years is given as under:

Year	PM10 (µg/m ³)	NO _x (µg/m ³)	SO ₂ (µg/m ³)
2017	93	12	7
2018	78	12	6

3.4.2 The trend of ambient air quality shows that the concentration of PM10, SO₂ and NO_x in the ambient air has decreased in 2018 as compared to 2017.

3.5 Major Parameters of Concern:

The major concern of the air quality is PM10. Detail of PM10, SO₂ and NO_x measured during the previous years tabulated in **Annexure-A**.

Chapter 4 – Sources of Air Pollution in Dera Baba Nanak

4.1 Major Sources

4.1.1 The following are the major sources of air pollution:

- (i). Vehicular Emissions
- (ii). Road Dust
- (iii). Burning of Garbage and Biomass
- (iv). Industrial Emissions
- (v). Mining
- (vi). Construction and Demolition Activities
- (vii). Other Sources

4.1.2 Due to paucity of time, detailed studies regarding source apportionment and carrying capacity could not be done, however, the Board has made some projections w.r.t PM₁₀ based on its in house experience:

1.	Industrial Emissions	5%
2.	Road Dust	33%
3.	Vehicular Pollution	25%
4.	Burning of Garbage and Biomass	34%
5.	Construction and Demolition Activities	2%
6.	Other Sources	1%

4.1.3 The source apportionment studies will be carried out in due course

4.2 Vehicular Emissions

Transport sector is one of the significant contributors to air pollution in Dera Baba Nanak due to movement of vehicle. At present about 200 vehicles (heavy transport vehicles, LMVs, cars & jeeps, two wheelers and three wheelers) are plying on the roads of Dera Baba Nanak.

4.3 Road Dust

The particles of dust that deposit from the atmosphere and accumulate along road sides are called road dust particles. Two main sources of road dust are deposition of previously suspended particles (atmospheric aerosols) and displaced soil. Some of the factors contributing to road dust are:

- (i). Emissions from the vehicular traffic,
- (ii). Construction and demolition activities, corrosion of metals structures etc.
- (iii). Presence of potholes on the road
- (iv). Absence of metaled roads / stabilized roads / un-stabilized movement area within industries
- (v). Presence of un-stabilized berms along the roads

(vi). Movement of overloaded transport vehicles

4.4 Burning of Biomass and Garbage

4.4.1 There are only small patches of agricultural land within the Dera Baba Nanak city, however, the city is surrounded by agricultural area and a lot of biomass is generated during post harvesting paddy and wheat seasons. During wheat season biomass burning is lesser than paddy season as the farmers use the wheat crop residue as cattle fodder. The effect of biomass burning in the paddy season is augmented due to the cold climate conditions.

4.4.2 At present, Municipal solid waste generated in the city is being dumped unscientifically in the present dumping site backside of Gurudwara. The garbage burning increases during winter season as the general public tend to burn the waste for heating purposes.

4.5 Industrial Emissions

4.5.1 The main stationary sources of air pollution are the industrial units, which are emitting particulate matter etc.

4.5.2 At present, there is no Air Polluting industry operating within the M.C. limits. The main stationary sources of air pollution is road dust and vehicular pollution, however there are 01 no. Brick Kiln and 04 no. Rice Shellers falling within the radius of 5 KM from the M.C. Limit of Dera Baba Nanak Town.

Sr. No.	Category	Number of Units
1.	Brick Kilns	01
2.	Rice Shellers	04
Total		05

4.5.3 It is pertinent to mention here that emission standards for most of the above industries are the most stringent for such type of industries i.e. 500 mg/Nm³.

4.6 Mining

Mining activities also contribute to the PM₁₀. However, in Dera Baba Nanak town, no mining activity is carried out except for Brick Kiln usage.

4.7 Construction and Demolition Activities

Dera Baba Nanak area is a small city. No major construction projects are being set up in the city.

4.8 Others

Other than above mentioned sources, episodic incidents like Holi, Dushera, Diwali, Gurupurab, New Year etc. are celebrated by bursting crackers, spraying colours etc. which also contribute to the ambient air quality.

Chapter 5 –Control on Vehicular Emissions

5.1 Key Activities

5.1.1 The vehicles are major pollution contributor, producing significant amount of nitrogen oxides, carbon monoxides and other polluting gases and particulate matter. To minimize the pollution generated from the vehicles, various actions have to be taken, which have been classified into following categories:

- (i) Public Awareness related,
- (ii) Enforcement related,
- (iii) Infrastructure related,
- (iv) Policy related

5.1.2 Some activities may have more than one category but they have been kept in the category where it has the major requirement. Following are the key activities for control on vehicular emissions:

Public Awareness

- (i) CVE 1 - Public awareness campaign for control of vehicular emissions

Enforcement Related

- (ii) CVE 2 -Remote sensor based PUC system
- (iii) CVE 3 - Extensive drive against polluting vehicles
- (iv) CVE 4 - Prevent parking of vehicles in non-designated areas
- (v) CVE 5 - Check fuel adulteration

Infrastructure Related

- (vi) CVE 6 - Widening of road and infrastructure for decongestion of road
- (vii) CVE 7 - Introduce intelligent traffic systems
- (viii) CVE 8 - Install weigh in motion bridges at the borders of cities
- (ix) CVE 9 - Construction of expressways/ bypasses to avoid congestion

Policy Related

- (x) CVE 10 – Phasing of vehicles more than 15 years old
- (xi) CVE 11 – Promotion of battery operated vehicles
- (xii) CVE 12 – Introduction of CNG based public transport
- (xiii) CVE 13 – Retrofitting of particulate filters in diesel vehicles for BS-V fuels

5.1.3 Various actions to be taken for the above activities are given below. Further, the details such as baseline, target, timeline, milestones have been given in **Annexure – B**.

5.2 CVE 1 - Public awareness campaign for control of vehicular emissions

Public support is essential for clean air mission to be successful.As part of overarching mission of clean air, Dera Baba Nanak, the public must be made aware of ill effects of air

pollution on health and contribution of vehicular emissions in the same. The public has to be motivated to play their role in curbing the air pollution. Following action shall be taken:

- (i) Public awareness campaign in print and electronic media
- (ii) Use of Social Media Facebook, twitter, Instagram
- (iii) Jingles on air pollution on local radio and TV
- (iv) Awareness drives in educational institutions
- (v) Public meetings
- (vi) Nukarnataks

5.3 **CVE 2 - Remote sensor based PUC system**

The Department of Transport will implement remote sensor based PUC system to eliminate the malpractices in the existing system of issuing PUCs. All PUC centres will be made online.

5.4 **CVE 3 - Extensive drive against polluting vehicles**

There is need to strictly enforce checking of PUC certificates so that unauthorized vehicles could be penalized. The traffic police shall place check points (Nakas) at differed locations and the performance of such check points shall be monitored. A whatsapp number shall be dedicated and publicized among general public so that complaints of public regarding polluting vehicles may be received and action taken.

Traffic Police and Department of Transport will be responsible for the activity.

5.5 **CVE 4 - Prevent parking of vehicles in non-designated areas:**

Presently, vehicles are being parked in a haphazard manner and on the roads as well, which leads to traffic congestion, thus, causing vehicular pollution. Traffic police shall impound vehicles parked in non-designated areas. Traffic police shall compile the list of prominent areas of such violations and special attention shall be paid. CCTV cameras shall be installed in such areas to capture the evidence. Number of challans shall be monitored.

5.6 **CVE 5 - Check fuel adulteration :**

Regular monitoring will be carried out to check adulteration of fuel and heavy fines may be imposed on the violators. Department of Food and Civil Supplies will be responsible and number of inspections carried out and action taken against the violators will be monitored on regular basis.

5.7 **CVE 6 - Widening of road and improvement of infrastructure to decongest roads**

The roads constructed within the city having traffic congestion shall be identified by the MC. The concerned department like PWD (B&R), Mandi Board and Municipal Council shall widen these roads suitably to decongest the traffic.

5.8 **CVE 7 - Construction of expressways/ bypasses to avoid congestion**

PWD (B&R) shall examine the need for any expressways/byepassesto avoid congestions.

5.9 CVE 8 - Introduce intelligent traffic systems

The traffic lights installed in the area shall be synchronized in such a way so as to achieve minimal stoppage of vehicles for a stretch of atleast 2 Kms. The traffic lights shall be placed at various intersection, so as to avoid traffic jams and smooth operation of the vehicles. Municipal Council in consultation with Traffic Police shall identify such places and provide traffic lights.

5.10 CVE 9 - Install weigh in motion bridges at the borders of cities

Municipal Council shall set up weigh bridges at each entry and exit of the city to avoid entry of overloaded vehicles to prevent generation of excess emissions of gases and dust.

5.11 CVE 10– Phasing of vehicles more than 15 years old

The Department of Trasport will ensure phasing out of vehicles more than 15 years old.

5.12 CVE 11 - Promotion of battery operated vehicles

The Department of Transport shall bring out the policy to promote battery operated vehicles.

5.13 CVE 12 – Introduction of CNG based public transport

The Department of Transport shall promote CNG based public transport

5.14 CVE 13 - Retrofitting of particulate filters in diesel vehicles for BS-V fuels

The Department of Transport shall bring the policy for the same once BS-V fuels are introduced.

Chapter 6–Control On Road Dust

6.1 Key Activities

- 6.1.1 The particles of dust that deposit from the atmosphere and accumulate along road sides are called road dust particles and originates interaction of solid, liquid and gaseous metals. Two main sources of road dust are deposition of previously suspended particles (atmospheric aerosols) and displaced soil. Additionally the emissions from the vehicular traffic, building construction and renovation, corrosion of metals structures etc. contribute directly to the road dust. To minimize the pollution generated from the dust emissions, following key activities are proposed:

Maintenance Related

- (i) CRD1– Maintain potholes free roads for free-flow of traffic
- (ii) CRD 2 – Water sprinkling
- (iii) CRD 3 – Mechanical sweeping

Infrastructure Related

- (i) CRD4 -Creation of green buffers along the traffic corridors
- (ii) CRD5 - Water fountains at major traffic intersections
- (iii) CRD 6 - Greening of open areas community places, schools and housing societies
- (iv) CRD 7 - Blacktopping of metaled road including pavement of road shoulders

- 6.1.2 Various actions to be taken for the above activities are given below. Further, the details such as baseline, target, timeline, milestones have been given in **Annexure- C**.

6.2 CRD 1 – Maintain potholes free roads for free-flow of traffic

All the agencies such as MC/ PWD/ NHAI will put in place a system of regular inspections to identify the potholes and ensure its filled up. It shall be monitored on regular basis. A web based/ mobile app shall be set up for Public to lodge complaint against the pothole and it shall be monitored for repair.

6.3 CRD 2 – Water sprinkling:

Municipal Council shall identify the dust prone roads and shall prepare schedule for regular sprinkling of water on these roads to suppress dust emissions. This activity shall be started immediately. In order to save the water, the Municipal Council shall utilize the treated wastewater of STP of the city.

6.4 CRD 3 – Mechanical sweeping:

Municipal Council shall procure adequate number of automatic sweeping machines for efficient and fast sweeping of the road / streets. The frequency of the sweeping shall be fixed appropriately by the Municipal Council.

6.5 CRD 4 – Creation of green buffers along the traffic corridors:

Municipal Council shall identify the trees with the help of Deptt. of Horticulture which may be grown along the roads without any obstruction to the traffic. These trees shall be planted at the suitable places. The maintenance of these trees shall be done by the Municipal Council.

6.6 CRD 5 – Water fountains at major traffic intersections:

Municipal Council shall explore the possibility of setting up of the water fountains at important traffic junctions to reduce the emission level including dust at these points.

6.7 CRD 6 – Greening of open areas community places, schools and housing societies:

In order to increase greenery in the city, the Municipal Council shall identify open areas/ lawns/ vacant lands including community places and schools in the city and these places be allocated to the NGOs or Industrial Associations for tree plantation and their maintenance. The activity of identification of the suitable sites shall be completed in a time bound manner and shall be allotted to the NGOs or Industrial Associations.

6.8 CRD 7 – Blacktopping of metaled road including pavement of road shoulders:

Some of the roads of Dera Baba Nanak are katcha which are the source of dust and gaseous emissions. These roads shall be converted into metaled road and the berms along these roads shall be stabilized with interlocking tiles or any other method.

Chapter 7–Control on Burning of Garbage and Biomass

7.1 Key Activities

7.1.1 There are only small patches of agricultural land within the Dera Baba Nanak city, however, the city is surrounded by agricultural area and a lot of biomass is generated during post harvesting paddy and wheat seasons. During wheat season biomass burning is lesser than paddy season as the farmers use the wheat crop residue as cattle fodder. The effect of biomass burning in the paddy season is augmented due to the cold climate conditions. To minimize the pollution generated from burning of garbage and biomass, following key activities are proposed:

Enforcement Related

- (i) CBGB 1 –Control of open burning of bio-mass in City
- (ii) CBGB 2 – Control of burning of municipal solid wastes
- (iii) CBGB 3 –Control of burning of agriculture waste and crop residue

7.1.2 Various actions to be taken for the above activities are given below. Further, the details such as baseline, target, timeline, milestones have been given in **Annexure- D**.

7.2 CBGB 1 –Control of open burning of bio-mass in City:

The burning of biomass like leaves of the trees creates lot of smoke in the area particularly during winter season, as such, the open burning of these biomass must be stopped. Municipal Council shall deploy its staff to have a check on various areas so as to forbid the inhabitants for open burning of the biomass.

A whatsapp number shall provide to the public alongwith the setting up of the dedicated control room for receiving complaints of public through this system.

CCTV cameras shall be installed at the important locations to monitor such incidents.

7.3 CBGB 2 – Control of burning of municipal solid wastes:

Presently, Municipal Council has one municipal waste dumping site along the GT Road, which has not been developed scientifically for the disposal of the municipal solid waste and consequently it has become the source of burning of waste on this dump. Lot of smoke is generated which contribute to the air pollution index. Similarly at the collection point and after sweeping the streets, the garbage collected may be burnt, instead of transporting to the dumping site.

Municipal Council shall identify and develop municipal waste dumping site as per the provisions of Municipal Solid Waste Rules, 2016 and the construction work of the said site shall be completed.

7.4 CBGB 3 – Control of burning of agriculture waste and crop residue:

There are only small patches of agricultural land within the Dera Baba Nanak city, however, the city is surrounded by agricultural area and a lot of agricultural waste is generated during post harvesting paddy and wheat season. During wheat season stubble burning is lesser than paddy season as the farmers use the wheat crop residue as cattle fodder. Punjab Pollution Control Board shall engage Punjab Remote Sensing Centre, Ludhiana for real time monitoring and reporting of stubble burning incidents. The District Administration shall constitute District Level Committees to verify the reported sites and issue challans to the violators besides filing of proceedings u/s 133 CrPc. Necessary directions / instructions shall be issued by the District Administration u/s 144 IPC to restrict harvesting of crops after 6.00 p.m to 6.00 a.m during crop harvesting seasons and attaching of the super SMS with the combine harvesters.

Chapter 8 – Control on Industrial Emissions

8.1 Key Activities

- 8.1.1 The main stationary sources of air pollution are the industrial units, which are emitting particulate matter, sulphur di-oxide and oxides of nitrogen etc. All the rolling mills, cupola furnaces and ceramic units are using coal / furnace oil as fuel in their furnaces emitting the aforesaid pollutants, besides the process / fugitive emissions. To minimize the pollution generated from the industries, following key activities are proposed:

Technology Intervention

- (i) CIE 1 – Conversion to side-hood suction in furnaces
- (ii) CIE 2 – Conversion to CNG/PNG from coal

Enforcement Related

- (iii) CIE 3–Conversion of natural draft brick kilns to induced draft
- (iv) CIE 4 – Action against non-complying industrial units

Infrastructure Related

- (v) CIE 5 – Shifting of industries from non-designated areas to industrial areas

- 8.1.2 Various actions to be taken for the above activities are given below. Further, the details such as baseline, target, timeline, milestones have been given in **Annexure-E**

8.2 CIE 1 – Conversion to side-hood suction in furnaces

Not applicable, as there is no induction furnace in Dera Baba Nanak Town.

8.3 CIE 2 – Conversion to CNG/ PNG from Coal

Not applicable, as there is no induction furnace in Dera Baba Nanak Town.

8.4 CIE 3 - Conversion of natural draft brick kilns to induced draft

There is no brick kiln in Dera Baba Nanak within M.C limit, however there is 1 no. Brick Kiln falling within the radius of 5 KM from the M.C. Limit of Dera Baba Nanak Town. The Punjab Pollution Control Board has issued directions to the existing brick kilns of the State to convert their conventional brick kilns to induced draft technology. The Brick kilns located in the district will be monitored for conversion to the new technology in a time bound manner.

8.5 CIE 4 - Action against non-complying industrial units.

The regular monitoring of industries is being carried out as per the policy of the Board. In case, any industry is found violating the provisions of the Air Act, 1981, action under the provisions of the said Act is initiated against the violating industries. The number of inspections carried out and action taken will be monitored regularly.

8.6 CIE 5 – Shifting of industries from non-designated areas to industrial areas

Not applicable, as there is no industry in non-designated area.

Chapter 9 – Control on Construction and Demolition activities

9.1 Key Activities

9.1.1 Dera Baba Nanak area is a small city. No major construction projects are being set up in the city. However, small construction activities are being carried out by the individual house and paving of streets by the MC on routine basis. To minimize the pollution generated from the construction and demolition activities, following key activities are proposed:

- (i) CCDA 1 –Enforcement of Construction & Demolition Rules.
- (ii) CCDA 2 – Control measures for fugitive emissions
- (iii) CCDA 3 – Ensure carriage of construction material in closed/covered vessels.

9.1.2 Various actions to be taken for the above activities are given below. Further, the details such as baseline, target, timeline, milestones have been given in **Annexure-F**.

9.2 CCDA 1 –Enforcement of Construction & Demolition Rules:

The necessary provisions of the C&D Rules, 2016 shall be implemented in the city to ensure proper management of these wastes.

Municipal Council shall identify suitable land for effective disposal of C&D waste.

Municipal Council shall frame mechanism for challaning the violators found dumping the C&D waste on non-designated areas.

The enforcement will be monitored through the use of technology and regular review.

9.3 CCDA 2 – Control measures for fugitive emissions:

Municipal Council shall develop a site for scientific disposal of C&D waste within six months.

Municipal Council shall ensure that

- (i) The builders provide proper curtains / sheets on the construction sites to avoid spreading of dust emissions into the environment.
- (ii) No dust should be emitted during demolition.
- (iii) No construction materials should be kept on the roads. The construction material inside the plots should also be kept in covered conditions and labour should be provided with all anti-pollution gears during the course of construction.

9.4 CCDA 3 – Ensure carriage of construction material in closed/covered vessels:

The relevant enforcement authorities will ensure that the construction material to be transported through trucks / vehicles shall be covered with tarpaulin to avoid the dust emissions.

Chapter 10 – Control on Other Sources

10.1 Key Activities

10.1.1 Apart from various measures being taken to control various sources of pollution, following activities will also be undertaken to control the pollution:

Public Awareness

(i). COS 1–Dissemination of Air Quality Index

Infrastructure

(ii). COS 2 – Establish an Air Quality Management Division at SPCB HQ in future.

(iii). COS 3 – Setup helpline in each city/town as well as SPCB HQ in future.

Policy

(iv). COS 4 - Coverage of LPG/PNG for domestic and commercial cooking

Enforcement

(v). COS 5 - Monitoring of DG sets and action against violations

10.1.2 Various actions to be taken for the above activities are given below. Further, the details such as baseline, target, timeline, milestones have been given in **Annexure-G**.

10.2 COS 1 – Dissemination of Air Quality Index

Punjab Pollution Control Board shall display the air quality index of the city at its prominent places for the awareness of the public including website, social media and print media.

10.3 COS 2 – Establish an Air Quality Management Division at SPCB HQ

There is need to strengthen technical capability of pertaining to air pollution. The Board will identify the requisite skill sets and number of technical staff required along with future roadmap for the Board's activities.

10.4 COS 3 – Setup helpline in each city/town as well as SPCB HQ

The Board shall set up a helpline system at headquarter and each city to receive the complaints from public and have effective feedback system.

10.5 COS 4 - Coverage of LPG/PNG for domestic and commercial cooking

Municipal Council shall identify the sources where the coal / wood are used as fuel at domestic and commercial cooking level. Municipal Council shall formulate a mechanism to eliminate the use of coal / wood in these activities. Ujwala Yojna of the Central Government shall be facilitated to the beneficiaries.

10.6 **COS 5 - Monitoring of DG sets and action against violations**

Municipal Council shall identify the commercial activities where the DG sets have been set up without fulfilling the norms for control of emissions and noise. Time bound action plan shall be prepared by the Municipal Council for removal of these DG sets. Punjab Pollution Control Board shall identify the illegal DG sets manufacturers and necessary directions for their non-operation / closure shall be issued. Punjab Pollution Control Board shall identify the industries where the DG sets have been set up without fulfilling the norms for control of emissions and noise.

Chapter 11–Graded Response Action Plan for Dera Baba Nanak

11.1 Graded Responses

11.1.1 In order to mitigate the impact of higher level of pollution when AQI crosses satisfactory level, Graded Response Action Plan has been prepared for Dera Baba Nanak for implementation under different Air Quality Index (AQI) categories namely, Moderate & Poor, Very Poor and Severe.

11.2 Agency Responsible for Graded Response

11.2.1 The concerned authorities responsible for taking action when AQI reaches various levels have been indicated against the proposed action. The authorities will work in coordination with and under the overall supervision of the District Level Committee.

11.3 Action in case of Severe AQI (Value between 401 to 500)

11.3.1 Following action shall be taken by the concerned authorities:

Sr.No.	Severe (AQI value becomes 401-500)	Agency responsible/Implementing Agency
1	Temporary closure of brick kilns, rice shellers etc.	PPCB
2	Stop construction activity	MC, Dera Baba Nanak
3	Alert in newspapers / local cable TV to advice people with respiratory and cardiac patients to avoid polluted areas and restrict outdoor movement.	MC, Distt. Administration & PPCB
4	Sprinkling of water at the various dust emission points	MC, Dera Baba Nanak
5	Deploy Traffic police for smooth traffic flow at the identified vulnerable areas	Traffic Police
6	Stringently enforce / stop garbage burning in landfills and other places and impose heavy fines on person responsible.	MC, Dera Baba Nanak
7	To increase the frequency of mechanized sweeping on roads with heavy traffic and water sprinkling also on unpaved roads.	MC, Dera Baba Nanak
8	Stop entry of heavy good vehicles except essential commodities into Dera Baba Nanak	Traffic Police
9	To take decision regarding closing of schools	District Administration

11.4 Action in case of Very Poor AQI (Value between 301 to 400)

11.4.1 Following action shall be taken by the concerned authorities:

Sr.No.	Very Poor (AQI value becomes 301-400)	Agency responsible / Implementing Agency
1	Restraining the operation of air polluting industries i.e. brick kilns , rice shellers etc.	PPCB
2	Banning of construction activities	MC, Dera Baba Nanak
3	Stop of garbage burning in the landfill areas or in the open fields	MC, Dera Baba Nanak
4	Water sprinklings at the dust emission points etc.	MC, Dera Baba Nanak
5	Strict vigil and enforcement of PUC norms	Traffic Police
6	Strict vigil and no tolerance for visible emissions from the vehicles and industries	PPCB and Traffic Police.
7.	Strictly enforce Supreme Court ban on fire crackers	MC, Dera Baba Nanak and Distt. Administration
8	Strictly enforce all pollution control regulations in the air polluting industries like brick kilns, rice shellers etc.	PPCB

11.5 Action in case of Poor AQI (Value between 201 to 300)

11.5.1 Following action shall be taken by the concerned authorities:

Sr.No.	Poor (AQI value becomes 201-300)	Agency responsible / Implementing Agency
1	Strictly enforce garbage burning in landfill and other places and impose heavy fines on person responsible	MC, Dera Baba Nanak
2	Increase frequency of mechanized cleaning of road and sprinkling of water on roads. Identify road stretches with high dust generation.	MC, Dera Baba Nanak
3	Stop use of coal / firewood in open eateries	MC, Dera Baba

		Nanak
4	Strictly enforce rules for dust control in construction activities and close non-complaint sites.	MC, Dera Baba Nanak
5	Close / Strictly enforce all pollution control regulations in the air polluting industries like brick kilns , rice shellers etc.	PPCB
6	Restricting air polluting industries i.e. brick kilns, rice shellers etc.	PPCB

11.6 Action in case of moderately polluted AQI (Value between 101 to 200)

11.6.1 Following action shall be taken:

Sr.No.	Moderately polluted (AQI value becomes 101-200)	Agency responsible / Implementing Agency
1	Increasing the frequency of mechanized cleaning the roads etc.	MC, Dera Baba Nanak
2	Sprinkling of water at the dust emitting points	MC, Dera Baba Nanak
3	To stop open burning of garbage and municipal solid waste	MC, Dera Baba Nanak
4	Close / strictly enforce all pollution control regulations in the air polluting industries like brick kilns , rice shellers etc.	PPCB

Chapter 12– Monitoring Requirements and Formats

12.1 Monitoring Requirement:

12.1.1 Following are the key components of monitoring requirements of the Plan:

- (i) Monitoring of activities for control on Vehicular Emissions
- (ii) Monitoring of activities for control on Road Dust
- (iii) Monitoring of activities for control on Burning of Garbage and Biomass
- (iv) Monitoring of activities for control on Industrial Emissions
- (v) Monitoring of activities for control on Construction and Demolition activities
- (vi) Monitoring of activities for control on other sources

12.1.2 Further, various activities can be classified into one of the following categories:

- (i) Public Awareness
- (ii) Enforcement
- (iii) New Infrastructure
- (iv) Maintenance activities
- (v) Policy Advocacy
- (vi) Technology Support

12.2 Development of Monitoring System

12.2.1 To work out detailed formats and setting up online system to track progress of various activities, a dedicated team of PPCB and NIC is working on it.

12.2.2 The system will ensure that information is captured at source and transmitted to the System and the system will be able to analyse and report it in the prescribed format. The system will generate different reports for use at different levels. The System will also have dashboard to present the key indicators and metrics.

Chapter 13–Governance and Supervision

13.1 Three Tier Monitoring

13.1.1 Monitoring will be done by the Departments concerned, which are executing or responsible for particular activities. In addition, there will be three level of Air Quality Monitoring Committees (AQMC) to review and monitor the status:

- (i) AQMC at District Level under Deputy Commissioner
- (ii) AQMC at State level under Principal Secretary, Environment
- (iii) Steering Committee under Chief Secretary

13.1.2 PPCB will set up a dedicated team for supporting coordination and monitoring of the Action Plan. It will also develop suitable IT platform for monitoring purposes.

13.2 AQMC at District Level

District Level Committee will be constituted under the chairmanship of Deputy Commissioner, Gurdaspur and the monthly meeting of the District Level Committee will be conducted to discuss / monitor the progress of the activities to be performed under the Action plan. The committee shall involve civil society organization and their participation will be ensured for achieving various targets mentioned in the Action plan. The district level committee shall constitute the followings:-

1	The Deputy Commissioner, Gurdaspur	Chairman
2	The Senior Superintendent of Police, Gurdaspur	Member
3	The Environmental Engineer, Punjab Pollution Control Board, Regional Office, Batala	Convener
4	The Executive Director, Punjab State Council for Science and Technology, MGIPA Complex, Sector 26, Chandigarh	Member
5	The Regional Transport Authority, Gurdaspur	Member
6	The Divisional Forest Officer, Gurdaspur	Member
7	Sub Divisional Magistrate, Dera Baba Nanak	Member
8	The Executive Engineer, PWD (B & R), Gurdaspur	Member
9	The District Town Planner, Gurdaspur	Member
10	The Executive Engineer, Punjab Small Industries & Export Corporation, 18, Himalya Marg, UdyogBhawan, Sector-17-A, Chandigarh	Member
11	The General Manager, District Industries Centre, Batala	Member
12	The Asstt. Executive Engineer, Punjab Small Industries & Export Corporation, Dera Baba Nanak	Member
13	The Chief Agriculture Officer, Deptt. of Agriculture, Gurdaspur	Member
14	The General Manager-cum- Project Director, NHAI, 17-L, Model Town, Ambala City.	Member
15	The Vertical Head – Projects, IRM Energy Pvt. Ltd., C.G. Road,	Member

	Navrangpura, Ahmedabad 380009, Gujrat	
16	The Sub Divisional Engineer, Punjab Water Supply & Sewerage Board, Dera Baba Nanak	Member
17	The Executive Engineer, (Drainage), Deptt. of Irrigation, Drainage Division, Gurdaspur	Member
18	The General Manager-cum- Project Director, NHAI, Jalandhar	Member
19	The Executive Officer, Municipal Council, Dera Baba Nanak	Member

13.3 AQMC at State Level

13.3.1 State Level Air Quality Monitoring Committee (AQMC) will comprise of the following:

1	Administrative Secretary, Department of Environment	Chairman
2	Director, Local Government	Member
3	Director, Transport	Member
4	Director, Industries and Commerce	Member
5	ADGP, Traffic	Member
6	Director, Environment	Member
7	Chairman, PPCB	Member
8	Representatives of NGO/ Expert Members	Member
9	Representatives of NGO/ Expert Members	Member
10	Joint Director, Environment	Convener

13.3.2 The State level Committee would meet every month to review the progress of the action plan and take corrective measures and also escalate issued to the Steering committee for intervention.

13.4 Steering Committee

13.4.1 There will be a Steering Committee under Chief Secretary and comprising of Administrative Secretaries of relevant administrative departments for monitoring the progress, resolving issues and enforcing accountability.

13.4.2 The Committee will comprise of the following:

1	Chief Secretary	Chairman
2	Administrative Secretary, Environment	Member
3	Administrative Secretary, Local Government	Member
4	Administrative Secretary, Industries and Commerce	Member
5	Administrative Secretary, Transport	Member
6	Administrative Secretary, PWD	Member
7	ADGP, Traffic	Member
8	Director, Environment	Member
9	Chairman, PPCB	Member

10	Additional Secretary, Environment	Convener
----	-----------------------------------	----------

Chapter 14 –Risk Mitigation Plan

14.1 Identification of Major Risks

Following are the major risks

- (i) Lack of formal source apportionment study
- (ii) Accuracy and completeness of baseline data, targets and milestones
- (iii) Lack of formal analysis of implementation barriers

14.2 Source Apportionment Study

It is important to have the assessment of various sources and their contribution to the air pollution and accordingly focus on controlling those sources. Currently no such study has been done. In order to mitigate the risk, Punjab Pollution Control Board shall get source apportionment study of the city conducted to adjudge various sources contributing air pollution in the area and mitigation thereof. The same will be incorporated in the Action Plan.

14.3 Accuracy and completeness of baseline data, targets and milestones

The baseline data, targets and milestones are not very accurate or complete. During the course of implementation detailed surveys and analysis will be carried out and the baseline data, targets and milestones will be suitably updated. This will be done within next thirty days.

14.4 Lack of formal analysis of implementation barriers

Various activities included in the action plan need to be carefully analysed with respect to implementation challenges so that suitable remedial measures could be envisaged. Efforts will be made to study various barriers and improving the efficacy and effectiveness of the proposed activities by overcoming the shortcomings in the present system.

Annexure A – Trends in Air Quality of Dera Baba Nanak

Month	PM10 ($\mu\text{g}/\text{m}^3$)						NOX ($\mu\text{g}/\text{m}^3$)						SO2 ($\mu\text{g}/\text{m}^3$)					
	2013	2014	2015	2016	2017	2018	2013	2014	2015	2016	2017	2018	2013	2014	2015	2016	2017	2018
January	71	74	71	126	113	62	13	13	13	18	14	10	7	7	7	9	8	6

Annexure D – Action Plan for Control on Burning of Garbage and Biomass

Sr. No.	Activity	Responsible Agencies	Base Line	Target to be achieved	Target Date	Milestones (Monthly / Quarterly)
1	CBGB 1 – Control on open burning of biomass in City	Municipal Council	Complaint based check	Zero burning	Regular activity	Identification of sites, monthly review in District Level Air Quality Monitoring Committee meeting
2	CBGB 2 – Control on burning of municipal solid wastes	Municipal Council	Complaint based check	Zero burning	Regular activity	Identification of sites, monthly review in District Level Air Quality Monitoring Committee meeting
3	CBGB 3 – Control on burning of agriculture waste and crop residue	District Administration, Department of Agriculture, Police, PSPCL, Revenue Department & PPCB	Identification of sites by PRSC (PAU) Regular monitoring under supervision of DC	Zero stubble burning	Seasonal activity	<ol style="list-style-type: none"> 1. Identification of sites 2. To create awareness among farmers regarding health effects of residue burning 3. Deptt. of Agriculture to provide subsidy for equipment/ machinery as per Govt. policy 4. PSPCL shall ensure electricity for in-situ management 5. Progress review in District Level Air Quality Monitoring Committee meeting

Annexure E – Action Plan for Control on Industrial Emissions

Sno.	Activity	Responsible Agencies	Base Line	Target to be achieved	Target Date	Milestones (Monthly / Quarterly)
1	CIE 1 – Conversion to side-hood suction in furnaces	Punjab Pollution Control Board	NA as no such industry exist	-	-	-
2	CIE 2 – Conversion to CNG/PNG from coal	Punjab Pollution Control Board & IRM	NA as no such industry exist	-	-	-
3	CIE 3 - Conversion of natural draft brick kilns to induced draft.	Punjab Pollution Control Board	1 no. brick kiln is operating within 5 km radius outside M.C. Limits.	To convert 1 no. brick kiln into Induced Draft Technology.	31/03/2019	Not to be operated without adopting Induced Draft Technology.
4	CIE 4 – Action against non-complying industrial units	Punjab Pollution Control Board	Regular inspection as per policy of the Board	100% compliance of environmental laws	Regular activity	Regular inspections by PPCB
5	CIE 5 – Shifting of industries from non-designated areas to industrial areas	Municipal Council	N.A. as there is no industry in non-designated area.	-	-	-

Annexure F – Action Plan for Control on Construction and Demolition Activities

Sr. No.	Activity	Responsible Agencies	Base Line	Target to be achieved	Target Date	Milestones (Monthly / Quarterly)
1	CCDA 1 – Enforcement of Construction & Demolition Rules.	Municipal Council	At present, no site identified for disposal of C & D waste	Identification of site for disposal of C & D waste Setting up of processing/ recycling plant for C&D Rules, 2016.	Three years	Identification-Three months Land acquisition-One year DPR-Three months Tendering-Six months Development& Commissioning-One year
2	CCDA 2 – Control measures for fugitive emissions	Municipal Council	At present, minimal measures being taken by the building contractors.	Preventive measures to comply with the C&D Rules	Regular activity	Identification of construction sites Checking for compliance of C&D Rules Challaning of violators
3	CCDA 3 – Ensure carriage of construction material in closed/covered vessels.	Municipal Council	At present non-documented activity being carried out	MC shall make record of C&D activities on day to day basis	Regular activity	Monthly review meetings at District Level

Annexure G – Action Plan for Control on Other Sources

Sr. No.	Activity	Responsible Agencies	Base Line	Target to be achieved	Target Date	Milestones (Monthly / Quarterly)
1	COS 1 – Dissemination of Air Quality Index	Punjab Pollution Control Board	--	-	-	-
2	COS 2 – Establish an Air Quality Management Division at SPCB HQ	Punjab Pollution Control Board	No such division exists	One required	One year	1. Develop methodology-Three months 2. Providing infrastructure-Six months 3. Implementation-Three months
3	COS 3 – Setup helpline in each city/town as well as SPCB HQ	Punjab Pollution Control Board	No such division exists	One required	One year	1. Develop methodology-Three months 2. Providing infrastructure-Six months 3. Implementation-Three months
4	COS 4 - Coverage of LPG/PNG for domestic and commercial cooking	Municipal Council	Domestic cooking- LPG Commercial cooking partially on LPG/ Wood/ Coal	Commercial cooking- LPG	One year	1. Identification-Two months 2. Awareness-Two months 3. Providing infrastructure-Six months 4. Implementation-Two months
5	COS 5 - Monitoring of DG sets	Punjab Pollution	Manual monitoring exists	Non-complying	Six months	Identification-Three months

	and action against violations	Control Board for industries & MC for residential/commercial areas.		DG set should not be allowed		Implementation-Three months
